LESLEY ELLIS

AFTERSCHOOL 2017-2018

Dear Parents,

This year's **LES Afterschool Program** has been developed to offer current interests of our students as well as some favorites from years past. We are very excited to have the opportunity to work with you and your student. You may use our program on a consistent basis or simply as a place to take a class and learn a new skill.

We have joined with **Arlington Center for the Arts, Coding for Kids, Einstein's Workshop, Knucklebones and Chess Wizards** to provide some expertise in these fields. We will be providing your student with the opportunity to learn skills in music, writing, sports, technology and much more! Through the activities that we offer, we are hoping to help your student develop some life-long skills, as well as an understanding about the importance of having recreational interests. To accommodate parents who do not need full day afterschool, we have added some scheduling **options for class times**.

We understand that afterschool hours are a very important part of your student's day. We want to make sure that your student participates in a **developmentally appropriate** and **enjoyable** program that balances and complements their academic experience. Take a look at this year's offerings for your student's age group. Please note that Elementary Rock Climbing and Ski Club have *an additional cost* for those students who are already contracted for afterschool.

We look forward to getting to know you and your student as we embark on this LES journey together.
